

<http://dx.doi.org/10.11646/phytotaxa.224.3.10>

**Holger Uhlich, Karel (C.A.J.) Kreutz & Stefan Rätzel (2015) A contribution to the taxonomy and phytogeography of *Orobanche alba* Steph. ex Willd. (Orobanchaceae). *Phytotaxa* 222 (1): 1–16.**

Please note that the images of figures 4 and 5 are swapped. So we are obliged to replace the image texts:

**Fig. 4** (p. 10) shows: “Syntype G0330044 of *Orobanche cuprea* (courtesy of the herbarium Conservatoire et Jardin botaniques, G-BOIS).”

**Fig. 5** (p. 11) shows: “Syntype G0330045 of *Orobanche cuprea* (courtesy of the herbarium Conservatoire et Jardin botaniques, G-BOIS). Lectotype (hic designatus) of *O. alba* subsp. *cuprea* (Boiss. & Balansa) Uhlich, C.A.J.Kreutz & Rätzel.”

The lectotypification (p. 4) is now correct:

“TURKEY. Cilicien: province Mersin (until 2002 prov. Icel), Buluklu (36°52' N / 34°34' E), Stigmate blanc. Parasite sur le *Satureia thymbra*. Bouloukli, près de Mersina, 23 April 1855, M. Balansa 765 (G-BOIS G0330045) (**Fig. 5**, the single plant).”

On this occasion we would like to correct another citation (the online version was originally stated):

Piwowarczyk, R., Madeja, J. & Nobis, M. (2015) Pollen morphology of the Central European broomrapes (Orobanchaceae: *Orobanche*, *Phelipanche* and *Orobanchella*) and its taxonomical implications. *Plant Systematics and Evolution* **301** (2): 795–808. <http://dx.doi.org/10.1007/s00606-014-1117-6>
