Abstract

Thirteen species of *Atypus* known from China are described, including seven species new to science: *Atypus flexus* sp. nov., *A. largosaccatus* sp. nov., *A. ledongensis* sp. nov., *A. pedicellatus* sp. nov., *A. sacculatus* sp. nov., *A. tibetensis* sp. nov. and *A. yajuni* sp. nov. The zoogeography of *Atypus* is discussed.

Key words: Araneae, Atypidae, *Atypus*, new species, identification key, China
