Cassini, C.S., Cruz, C.A.G. & Caramaschi, U. (2010) Taxonomic review of *Physalaemus olfersii* (Lichtenstein & Martens, 1856) with revalidation of *Physalaemus lateristriga* (Steindachner, 1864) and description of two new related species (Anura: Leiuperidae). *Zootaxa*, 2491, 1–33.

It has been brought to our attention that we have erroneously referenced some numbers of the type series of *Physalaemus feioi*. Some type specimens were donated from the collection of the Museu de Zoologia João Moojen de Oliveira (MZUFV) to the collection of Museu Nacional (MNRJ). In the original publication we erroneously kept original MZUFV numbers while changing the collection acronym to MNRJ. The mistake could be noticed and corrected because MNRJ curators kept both numbers (MZUFV and MNRJ) with every specimen. Thus, the composition of the type series remains the same, both amount and identity, and are corrected herein as follow. In the original description of *P. feioi*, pages 21 and 22, the lines designating holotype and paratypes should read (see the synopsis of the alterations in the Table 1):

Holotype. **MNRJ 57028** (Figs. 17, 18), adult male, collected at Mata da Biologia (20°45'S, 42°51'W; elevation 700 m), Campus of Universidade Federal de Viçosa, Municipality of Viçosa, State of Minas Gerais, Brazil, on 15 January 2005, by Carla S. Cassini and André F. Gualberto.

Paratypes. Collected at the type locality: **MNRJ 57032** (female), collected by Renato N. Feio, on 26 August 1997; **MNRJ 49945–49947** (males), collected by Carla S. Cassini and André F. Gualberto, on 26 October 2007; **MNRJ 57033** (male), collected by Kevin Middlebrooks, on 02 October 2003; **MNRJ 57034** (male), collected by Kevin Middlebrooks and Jussara S. Dayrell, on 04 November 2003; **MNRJ 57035** (male), collected by Carla S. Cassini, Emanuel T. Silva, and Jussara S. Dayrell, on 02 December 2004; **MNRJ 57036–57040** (males), collected by Eliana F. Oliveira and Jussara S. Dayrell, on 09 December 2004; **MNRJ 57041** (female), **MNRJ 57042** (male), collected by André F. Gualberto and Carla S. Cassini, on 15 January 2005; **MNRJ 57043–57044** (males), collected by André F. Gualberto, Carla S. Cassini, and Jussara S. Dayrell, on 25 January 2004; **MNRJ 57045** (female), collected by Carla S. Cassini, Eliana F. Oliveira, and Jussara S. Dayrell, on 27 April 2005; **MZUFV 2539** (male), collected by Vicente W.D. Casali, on 02 January 1996; **MZUFV 2542** (male), collected by Vicente W.D. Casali, on 02 January 1996; **MZUFV 3189** (male), collected by Alexandre L. Silva, on 12 November 1997; **MZUFV 3614** (female), collected by Alexandre L. Silva, on 13 February 1998; **MZUFV 5297** (female), collected by Kevin A. Middlebrooks and Paula F. Leão, on 31 October 2003; **MZUFV 5679** (male), collected by Carla S. Cassini and Jussara S. Dayrell, on 31 October 2003; **MZUFV 5680** (male), collected by Carla S. Cassini and Jussara S. Dayrell, on 31 October 2003; **MZUFV 5817** (male), collected by Carla S. Cassini, on 02 December 2004; **MZUFV 5894** (female), collected by Carla S. Cassini and André F. Gualberto, on 15 January 2005; **MZUFV 5998** (male), collected by Carla S. Cassini, on 25 January 2004. Mata do Paraíso (20°48'03"S, 42°52'49"W, elevation 732 m), Municipality of Viçosa, State of Minas Gerais, Brazil: **MNRJ 57029** (male), collected by Renato N. Feio, on 21 September 1992; **MNRJ 57030** (female), collected by Carla S. Cassini and Eliana F. Oliveira, on 21 October 2004; **MNRJ 57031** (female), collected by Michael E. Nagai, on 26 January 2006.

Adicionally, in the description of *P. orophilus*, pages 25 and 26, the legend of figures 21 and 22, respectively, showing plates of the holotype should read:
